INNOVATIONS, TECHNOLOGIES, SPEED

## SCENE 4

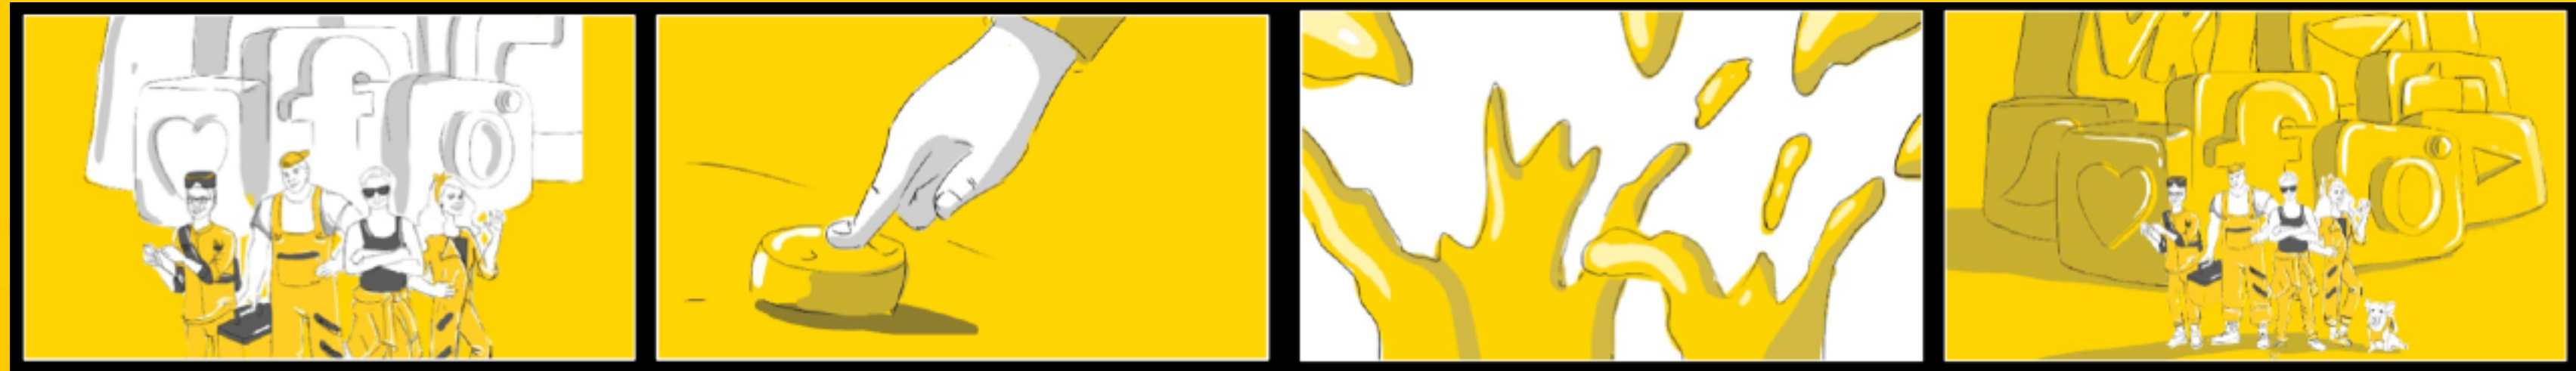

In the yellow world, we see a man - in the background last word/sign. He asks the question:

"What color innovations, technologies, speed is?"

At the same time camera passes by our character and getting closer to the letter O, which begins to behave like a motorcycle wheel. The frame closes on the letter O, spinning like a circle. Then camera moves away from the wheel of a real motorcycle that drives among identical-looking cars. Return to the gray world. Camera in side position follows speeding motorcyclist dressed in yellow. The motorcycle goes out of the frame revealing the yellow world and all characters in the last scene.

INTERNET

## SCENE 5

Our characters stand against the background full of social media symbols.  
White icons behind them are in contrast with the yellow world. The  
question is:  
"What color internet is?"

One of the characters leans down and turns on the detonator standing on  
the ground. An explosion of yellow color. Yellow paint bursts in slow  
motion. After a while the frame is filled with yellow umbrellas. It turns out  
that our characters hid behind them. After folding the umbrellas we can  
see that as a result of the explosion of yellow paint white icons turned into  
yellow.
