

MUSIC PRODUCER

The second proposition is Zeppy Zep. A longtime DJ, producer and sound designer from Cracow. He collaborated with many outstanding artists of the European music scene. He also works on commercial projects and widely known advertisements.

DIRECTOR

I am a director and screenwriter who likes getting challenged and always try to step out of my comfort zone. I take part in both commercial and artistic projects, successfully creating ads and branded content for brands.

As a cinema lover, I'm primarily interested in feature and documentary forms. Music was always a great passion of mine, which is why music videos were one of my primary interests.

You can always find an analog camera in my bag. Looking at the surrounding reality through a viewfinder has an indisputable impact on how I compose the frames in my film works. Thanks to photography I feel I can see much more, I nurse my internal sensitivity and pay closer attention to details.

Because of photography I felt the urge to use negative film stock. So far, I have shot videos on 8, 16 and 35mm, but at the same time, digital technology and modern solutions are also close to me.

I am currently working on a script for my first short feature film.
